

AerGlas™

General Information

October 2010

AerGlas™ LHR I – V is a multi-ply fiberglass product ideally suited to provide additional surface protection in areas of severe abuse. AerGlas™ LHR products are recommended for flat surfaces.

Product Features

- Integrally colored base provides excellent damage resistance and panel protection, which helps to minimize the aesthetic appearance of scratches and damaged areas.
- Thermoplastic resin system is more flexible than other fiberglass-supported products, making it much easier to cut and handle and allows for easy edge wrapping.
- Can be wrapped around a radius of 1/8 inch (3.2mm) with the use of a heat gun.
- Easily complies with the latest 65/65/200 heat release rate and smoke density requirements.
- Stain/solvent-resistant top facing makes AerGlas™ cleanable and maintainable.
- Unlimited custom color and design availability is ensured and backed up by Schneller's well-equipped and experienced Design and Color Matching staffs.

Product Specifications

- Qualified to Boeing DMS 2389
- AerGlas™ I - V is supplied in sheet form up to 60 inches x 130 inches (1.5 meters x 3.3 meters).
- AerGlas™ LHR is supplied in continuous rolls 60 inches (1.5 meters) wide.
